Objective

As an enthusiastic recent graduate in the field of web development with a focus on PHP-Laravel, I am keen to apply my academic knowledge and fresh perspective to contribute to an innovative organization. My academic projects have provided me with a solid foundation in MVC architecture, object-oriented programming, and database principles. I am adept in front-end technologies such as HTML and CSS and am committed to further developing my skills in Laravel and related technologies. I am eager to embrace new challenges and rapidly adapt to new technologies, aiming to become a valuable asset to your development team.

Education

| | | |
|-------------------------------|-------------------------------|------------------|
| -Bachelor of Computer Science | University of Mansoura, Egypt | 10/2020 - 7/2024 |
|-------------------------------|-------------------------------|------------------|

Relevant Coursework

- CCIC Training Course of Backend Development
- Laravel Web Development : In-depth study of Laravel framework, focusing on building scalable web applications.
- PHP Programming : Native PHP
- Object-Oriented Programming (OOP) : Principles and practices of OOP
- Database Design : Fundamentals of database systems, including data modeling and SQL.
- Web Design and Development : creating user-friendly and responsive websites.

Skills

-Technical Skills:-

- Web Development : HTML, CSS, Bootstrap .
- Backend Development : PHP, Laravel, MySQL, RESTful APIs.
- Programming : C#, Object-Oriented Programming (OOP)
- Software Engineering : MVC Architecture, Api , Clean Code ,and SOLID Principles
- Version Control : Git

-Soft Skills:-

- Language : English - Arabic
- Interpersonal : Effective communication and presentation skills
- Personal : High level of patience and adaptability

-Professional Experience:-

- More than a year of study and learning in developing web applications using Laravel.

Projects

- FPX website and application(My graduation project):

I designed a website dedicated to analyzing player data and identifying talent for the Egyptian League

- E-commerce website(MVC):

Developed a comprehensive e-commerce platform using Laravel and MySQL, implementing features such as product listings, shopping cart functionality, etc

-Hospital management system:

Create a system to manage hospital operations, including patient records, appointment scheduling, and billing, etc

- Book Shop Application (API only):

Developed an e-commerce application using Laravel and MySQL, featuring user authentication, book management, cart functionality, order processing, payment integration (Stripe), and product reviews.
